David,

We anticipate releasing the October 2017 EPA sampling results to you by the middle of next week. In order to provide them directly to you, PII needs to be redacted. That unfortunately did not happen today.

We anticipate releasing the redacted results to you next week and the unredacted results to Juneau County pursuant to the EPA-Juneau County Data Sharing Agreement. We understand that the County(ies) may have a data sharing agreement with AGC.

Subject: NE Juneau County (WI) Groundwater Investigation

Chuck: In the above report released yesterday, EPA reports that it performed a preliminary study of the area in October 2017 by sampling 13 private wells with six of the wells exceeding the nitrate MCL. The data from this preliminary study are not included in the materials. Are you able to produce these results to us or via the County and the NDA? Are these wells within the 104 wells reportedly sampled or are they in addition to? Please advise.

Thank you.
